**2010 AIR CHARTER SAFETY SYMPOSIUM TO ADDRESS CRITICAL SAFETY
ISSUES AFFECTING THE PART 135 COMMUNITY**

Alexandria, VA, November 20, 2009 — The Air Charter Safety Foundation (ACSF) will hold its annual Air Charter Safety Symposium on March 2-3, 2010, at the Marriott Westfields in Chantilly, VA.

The 2010 Symposium will showcase a number of critical safety issues confronting the Part 135 on-demand air charter and fractional ownership industry. Planned sessions include:

- Implementation of Risk Assessment Tools
- Financial Benefits to Safety Assessment
- NTSB's Increasing Focus on Part 135
- Implementing and Evaluating SMS from a Small Operator's Perspective
- Security Preparedness for International Operations
- International Safety Issues
- Examination of the Conflicts Between Safety Programs and Legal Proceedings

“The Air Charter Safety Symposium has quickly become one of the most popular annual events in the charter community because of the interactive format, outstanding selection of speakers and important issues addressed affecting all on-demand operators and shared aircraft program managers,” stated ACSF President James K. Coyne. “With continued scrutiny from Capitol Hill, the Federal Aviation Administration and the National Transportation Safety Board on safety issues, the 2010 Symposium is a must-attend event to learn the latest developments and practical techniques for implementation of safety programs.”

An early-bird rate of \$399 is being offered to ACSF members who register for the Symposium on or before February 16, 2010.
